

Testimonials from Clients of the CUNY Photonics CAT

The CUNY CAT Gets Results...

...in Economic Development

"We at Quantronix would like to express our continuing appreciation to the

CAT for your assistance in developing and promoting our Titan high energy Ti:Sapphire amplifier. Quantronix received new orders for 20 new amplifiers over the past year, which contributed over \$4M in revenues." (2003)

—David Heck, Direct of Sales-Scientific, Quantronix, East Setauket, NY

SCI *"Research assistance from the CAT has been essential to maintaining SCI's position in the semiconductor industry."* (2003)

"The assistance of the CUNY CAT staff has enabled us, in spite of these difficult economic times, to achieve revenues of approximately \$740,000 during the 2001-02 program year."

—Fred Pollak, President, Semiconductor Characterization Instruments, Brooklyn, NY

"The NYSTAR-sponsored corrosion and crack detection project helps in moving our company into adjacent commercial markets while advancing state of the art technology. In addition to job savings, our association with CUNY under this project offers significant cost savings to Lockheed Martin." (2003)

—Thomas Notaro, Manager, Advanced Programs, Lockheed Martin, Mitchel Field, NY

...and in Workforce Training

Metavac, Holtsville, NY

"Metavac hired Edgardo Meneses, a graduate of the Laser and Fiber Optics AAS degree program at Queensborough Community College. Metavac is pleased that this important degree program is in place in the New York Metropolitan Area. We hope that it will continue to supply photonics-related technicians to industry."

—Anthony Mancusco, Program Manager

Photonics Industries International, Bohemia, NY

"My company hired one of your graduates as a technician and saved at least \$15,000. I expect to need about 10 new technicians in the next year. I strongly urge you to recruit as heavily as possible for your degree program. I would be pleased to send one of our people to speak to high school programs about job opportunities in the laser field."

—Yusong Yin, President

STD Fibre Works, Middle Village, NY

"In Spring 2003, STD Fibre Works Ltd. arranged for four of its employees to attend the continuing education class on Fiber Optics: Nuts and Bolts of the System at Queensborough Community College. This course adds value to our employees skills and knowledge in a cost effective manner."

—Russell Anderson, COO/CFO
